2020

Andre Defremont

Blockchain Developer (C.I.O) @ Amachains
Belém

Resumo

Bachelor in Information Systems, worked for a company that provided services and systems to public and private companies (.NET, C#, HTML, CSS, JS, SQL). The experience for about 6 years, enabled me to know several systems, languages and parallel knowledge as Digital Marketing Consultant, Social Media and Web Design.

I worked remotely in 2016 at LEAPFORCE with evaluation research for various companies like Facebook, I stayed the maximum contract time per project and excellent productivity.

Experience with mobile applications (IONIC, JAVA) and value the continuous improvement of UX / UI in my projects because I know that this is the differential that we can get in our services. I work constantly with web projects (Wordpress, Angular, HTML, JS, CSS, MERN, Dapps, Blockchain, Hyperledger) and I like to contribute in other projects with my skills and knowledge.

I am currently focusing on Blockchain technologies for databases and highly interactive interfaces with new features and front end frameworks:

- Hyperledger
- Docker
- NodeJS
- React / Vue.js / Angular

Let me know if you have some proposal that fit in my skill and knowledge. Also check my portfolio for details about some projects, and contact-me.
